CH 3: Processes

Ch 4: Threads

Know diagram on 3.8 P-threads are POSIX threads.

java has threads. They can be extended and are "run"able

Ch 5: Process Synchronization

race condition.

`x++ == load x into register; add 1; store x;`

that can be done on multiple CPUs.

Deadlock means literally nothing can happen. everything broke

know conditions for deadlock and how to setup

approx slide 7.5

Exam ends at chapter 7
