GOTO

After getting closure, we need to figure out where we're going next

All those Grammar Items construct states in the DFA

[Look at Slide ~61 for the LR\(0\) Items](#)

Lecture 4d YACC

```
%%  
E:  E '+' T  
    | T  
    ;  
T:  '(' E ')'  
    | 'a'  
    ;
```

Review

- review sheet pasted in blackboard
- front end stops at intermediate code generation
- fully define like a paragraph a piece at least. with examples. know his definitions.
- *REGEX* WILL be on there.
- maybe not using a simple lex

- *write a simple recursive descent parser for a simple language*
